

Commendation Recommendation

To: Star Gate Command, Gen. Landry Commanding Officer
CC: International Oversight Advisory
From: Major Alexei Bodrov, Unit Commander, GR-1 (RFAF, USAF)
Date: March 9, 2014

General Landry,

Attached please find a completed nomination package and my recommendation as Unit Commander of GR-1 for recognition of Captain Sharn Rennet, USAF, with the Silver Star for gallantry in action against the Wraith and an armed individual of indeterminate allegiances.

As you are aware, mission reports for our recent classified mission to Nardol-3BG describe Cpt. Rennet's cool thinking under pressure when dealing with the personage of one ex-Lieutenant Ford. Captain Rennet's life, along with the lives of several other team members were threatened when Ford appeared from under a quantum cloak holding a live grenade.

Not only was Cpt. Rennet able to defuse the situation, but through his quick thinking we gained a temporary ally in defeating the Wraith presence on the surface of Nardol-3BG and in retrieving the DHD control crystal which was crucial to the completion of Drs. McKay's and Zalenka's mission.

Additionally, through his gallant actions, Cpt. Rennet was able to open a friendly dialog with Ford and it is my belief that he may have been successful in convincing Ford that we are willing to work with him and honor his desire for freedom.

I strongly believe that Cpt. Rennet's actions meet the requirements of gallantry in action against an enemy that characterize the USAF's nominations for the Silver Star and I appreciate your sincere consideration of this nomination.

Major Alexei Bodrov, Unit Commander GR-1, Commander of the USS Fenrir
(RFAF, USAF)
